

# Afforestation in Poland – the past and the present

‘Forest in Poland and Europe. Characteristics  
and management’

# Polish forests in Europe

In Poland afforestation amounts to 30% of the total area. Our forests constitute 6% of European Union green areas. We have more coniferous than deciduous trees.

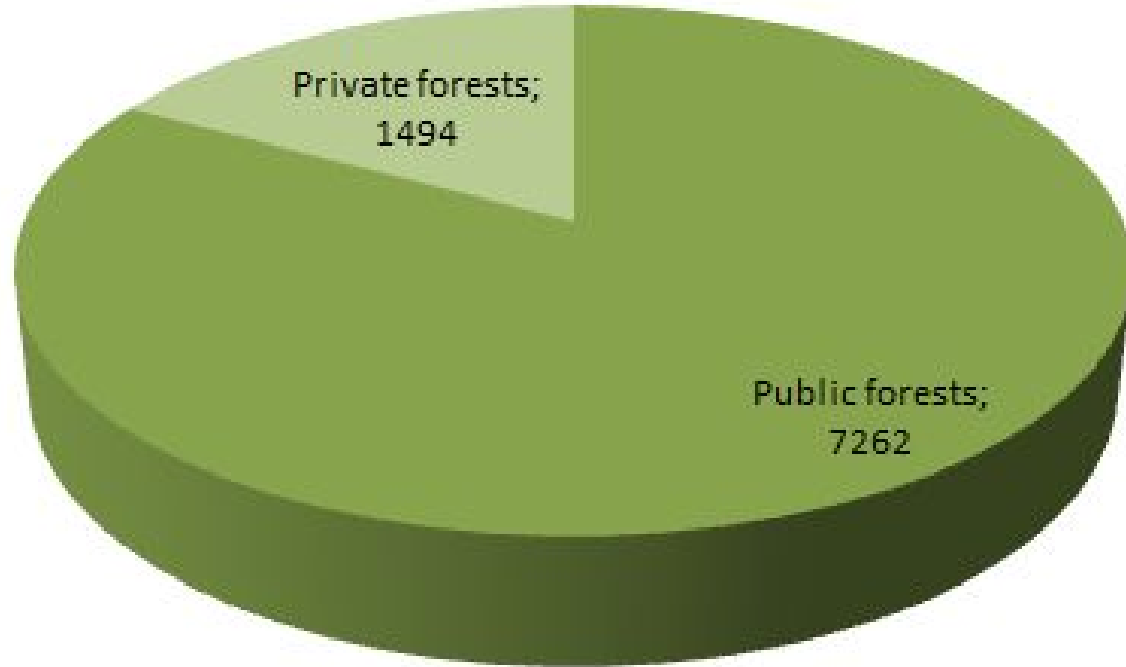

# Forests in Poland- Today

Nowadays, Lubuskie province has the biggest afforestation rate. Green areas cover about 49% of the total province's area.
